ABOUT

Experienced in ML with healthcare/EEG data and Web development with React.js/Next.js. Interested in creating practical, impactful solutions while strengthening core technical skills.

QUALIFICATIONS

Degree/	University/School	Passing Year
B.Tech- CSE	IILM University, Greater Noida	2023-27
12 th Class	Delhi Public Convent School	2022-23
10 th Class	Delhi Public Convent School	2020-21

INTERNSHIP EXPERIENCE

AI Engineer Intern	Infosys Springboard	Dec2025 – Feb2026
- Cleaned and prepared cricket match data and created useful performance features. - Trained ML models to predict player runs and wickets for upcoming matches. - Built a simple dashboard to show predictions and player performance trends.		
Machine Learning Data Science - Intern	Svaarogyam Medical Devices Pvt. Ltd.	May 2025– July 2025
- Worked on healthcare ML tasks, including data cleaning, preprocessing, feature extraction, and building predictive models. - Built and implemented end-to-end ML pipelines for practical use cases. - Collaborated in a remote team to deliver project milestones in the medical devices domain.		

ACADEMIC PROJECTS

- Title: INORA – Multi-Channel EEG-Based Control** *Dec 2025 – Jan 2026*
 - Tools/ Technologies used:** AD620, TL072, ADS1115, ESP32, Python, NumPy, SciPy
 - Description:** Designed and built a low-cost 3-channel EEG acquisition system with differential amplification and DRL noise stabilization. Implemented real-time signal processing and used EEG signals to control a Pong game, demonstrating practical brain-signal-based interaction.
- Title: BrainScore – Predicting Depression using Machine Learning.** *Mar 2025 – Nov 2025*
 - Tools/ Technologies used:** Python (pandas + sklearn), Google Collab.
 - Description:** Collected and processed real EEG data from 58 patients (20 channels each) and Applied filtering and extracted 20+ features: entropy, HFD, band powers, skewness, etc and Built a Decision Tree Classifier with patient-level train-test split and Achieved 89.99% Accuracy.
- Title: AHAR – Food-Donation-System** *Mar 2024 – Apr 2024*
 - Tools/Technologies used:** MERN Stack (MongoDB, Express.js, React.js, Node.js), Google Maps API.
 - Description:** Developed a food donation platform connecting restaurants, events, and societies with NGOs for surplus food distribution. Implemented real-time tracking, route mapping, and delivery coordination to ensure efficient and transparent operations while enabling employment opportunities for underprivileged delivery agents.

CERTIFICATION/ACHIVEMENTS

- Secured 1st place in the Call for Paper event at SRM Institute of Science and Technology.
- Hackathon Winner (1st Rank) — Secured 1st place among 1,004 participants (118 teams).
- Completed Infosys Springboard Pragati: Path to Future – Cohort 6 focused on technical and professional development.
- Completed Data Structures & Algorithms course (Sigma Batch) from Apna College.
- Solved 250+ Data Structures & Algorithms problems on LeetCode.
- Research paper accepted at the IEEE Sponsored 2026 International Conference on Emerging Trends in Networks and Computer Communications (ETNCC 2026) for the paper "INORA: A Low-Cost 3-Channel EEG Acquisition System with Driven-Right-Leg Noise Suppression for BCI Prototyping."

TECHNICAL SKILLS

- Machine Learning:** Supervised Learning, Explainable AI, Feature Engineering, Data Preprocessing.
- Programming Languages & Development:** Python, Java, JavaScript, React, MERN Stack (MongoDB, Express.js, React, Node.js)
- Software Tools & Platforms:** Git, GitHub, Jupyter Notebook, Google Colab, VS Code.
- Core Computer Science Concepts:** Database Management Systems , Operating System , Computer Networks .
- Professional Skills:** Team Collaboration, Adaptability, Research writing.
